Informatics graduate with a strong interest in IT Support, networking, and system administration. Experienced in troubleshooting system and network issues through hands-on projects, including an IT Support Troubleshooting Lab simulating real-world helpdesk scenarios. Familiar with Linux environments, network simulation using Cisco Packet Tracer, and basic web technologies (HTML/CSS). Able to analyze technical problems, apply structured troubleshooting, and provide reliable support. Eager to grow in IT Support roles and develop further in network engineering and cybersecurity.

Work Experience

University of Bengkulu - Bengkulu, Indonesia <i>Assistant Lecturer (Computer Networks & Operating Systems)</i> A public university providing higher education in Informatics and related fields. - Assisted students during lab sessions in understanding networking and operating system concepts - Supported practical activities related to Linux and basic networking configuration - Guided students in network simulation using Cisco Packet Tracer - Helped troubleshoot basic system and network issues during practicum sessions	Aug 2023 - May 2024
Google, GoTo, Tokopedia, Traveloka - Jakarta, Indonesia <i>Machine Learning Cohort at Bangkit Academy 2024 Batch 1</i> A technology training program by Google, GoTo, Tokopedia, and Traveloka focusing on industry-ready skills in machine learning. - Completed structured training in problem-solving, programming, and collaboration - Developed a machine learning model as part of a team project - Experienced working in a structured and deadline-driven environment	Feb 2024 - Jul 2024
Freelance / Personal Project - Remote <i>Web Developer (Freelance)</i> - Developed a responsive landing page using HTML and CSS - Translated user requirements into a functional and user-friendly interface - Ensured compatibility across different devices	Oct 2025 - Dec 2025

Education

University of Bengkulu - Bengkulu, Indonesia <i>Bachelor of Informatics Engineering, 3.74/4.00</i> - Participated in Bangkit Academy 2024 (Machine Learning path) - Assistant Lecturer in Computer Networks & Operating Systems practicum	Jun 2021 - Feb 2026
---	---------------------

Projects

Office Network VLAN & ACL Implementation - Designed and simulated a VLAN-based network using Router-on-a-Stick - Configured inter-VLAN routing and DHCP for multiple departments - Implemented basic access control using ACL for network segmentation - Analyzed connectivity behavior and troubleshoot communication issues between VLANs
IT Support Troubleshooting Lab Github Repo - Developed a hands-on IT Support troubleshooting project simulating real-world helpdesk scenarios and user-reported issues - Documented common IT issues such as no internet access, DHCP failure, DNS resolution issues, and intermittent network problems - Performed structured troubleshooting using tools such as ipconfig, ping, tracert, and nslookup - Identified root causes, applied solutions, and defined preventive actions for each case - Created practical guides for network setup, software installation, and system troubleshooting

Skills

- IT Support & Systems:** Basic troubleshooting, Windows & Linux environment, technical support
- Networking:** Basic TCP/IP, VLAN (simulation), Network Segmentation, Cisco Packet Tracer
- Programming & Tools:** Python (Basic), Git
- Database:** MySQL (Basic Querying)
